## Cool Pets

With UK fanciers facing the problems of travelling to shows during what is predicted to be one of the hottest summers on record, Midlands-based Solar Gard has launched a new automotive window film.

UK Managing Director Peter Reece told *Fur & Feather*: "Rabbits and other small furies travelling to exhibitions may face increased risks of stress, dehydration and heatstroke. Controlling key elements of your car's internal environment will help ensure that they arrive at their destination in peak condition.

"Because window film can cut 99 per cent of UV rays and reject over 50 per cent of solar heat, it's one of the easiest and most effective ways to maintain the optimum travelling environment and, of course, these benefits extend to all passengers."

- Prices to tint a whole car vary between £250 and £450, depending on the size of the car. For more details call the UK service centre on 01905 640 400.

## Homeless bunnies hop into new homes

Rabbits at The Blue Cross in Hertfordshire have new homes.

The new rabbitry at Kimpton, Hertfordshire, was opened in May. It was built to house guinea pigs and was made available to the public through the 'Support Adoption For Pets' scheme, a pet care retailer, Pets at Home.

It is accommodating several rabbits. Four cavies currently being rehomed are found.

Each unit is the size of a garden shed and comes equipped with everything a rabbit needs. Bunnies occupied. Lynda Campbell, Blue Cross centre manager, says: "Rabbits need lots of mental stimulation so they will be really happy in their new homes."

Former Eastenders actress Anita Dobson was one of the first to adopt a rabbit from the homeless babies a cuddle.

- The Blue Cross receives no government funding and relies on donations. For more information visit [www.bluecross.org.uk](http://www.bluecross.org.uk)
