A better environment inside and out.™

ComputerCut[®]

One system, endless possibilities.

“ ComputerCut gives me full control – over materials and materials salvage, and site preparation – I can now do it all and I couldn’t be happier with the results. But the most important thing ComputerCut has done is allowed me to grow my business. In addition to tinting, I now offer vinyl signage – commercial vehicles, storefronts and logos – as a growing part of my business.”

Kevin Allen
Window Wizard, Boaz, AL

Increase Proficiency, Speed and Capability.

Today’s marketplace isn’t what it used to be.

With information and services available in a micro-second, anyone – even the smallest of businesses – can become tomorrow’s industry leader. What’s the secret to success? Innovation and efficiency.

That’s what ComputerCut® is all about.

ComputerCut opens the door to more customers, increased business volume, more rapid job completion, tighter and more efficient inventory control and most importantly, brand new, revenue-generating business avenues. Career-long car tinters, architectural window film dealers, signs and graphics shops, paint protection film installers; all can increase proficiency, speed and capability with ComputerCut.

“ Rather than hiring another person, we invested in ComputerCut to increase our productivity. Since then, we’ve had unbelievable savings on materials. Plus, ComputerCut enables us all to work at a much faster pace. Best of all, the service and support are great. Someone is always accessible to answer any questions we have.”

Ann Hovdenes
Sun Shield Center, South Dakota

Big Business the Easy Way

There are many reasons why purchasing ComputerCut is the best decision you could make for your business.

It's an opportunity to truly diversify your business

With ComputerCut, there's no limit to the type of customers you can solicit, what you can do, or how big your business can become. The ComputerCut database gives you access to auto window tinting, vinyl graphics and signs, banners, architectural window film, paint protection patterns and more.

You can work faster than ever before

The ComputerCut plotter takes a downloaded pattern and cuts it in a matter of minutes. The patterns are carefully cut according to established specifications, so any trimming that you may have to do on the car will be minimal - an added selling bonus for customers.

Multiple databases plus your own custom patterns

ComputerCut has different databases for automotive, paint protection, flat glass applications, glass art and decals. In all, ComputerCut offers over 80,000 patterns. Plus, ComputerCut allows dealers to keep their custom jobs in a personal database. You can create your own designs with practically any design program - Corel Draw®, Adobe Illustrator®, Freehand®, Inkscape Digital Graphics or other sign programs. By storing them on your personal database it saves you valuable time when you come to use them again. We also offer graphic design for custom work.

It dramatically cuts your supply costs and inventory

Patterns are sized, then arranged on screen to make maximum use of your film - eliminating up to 20% of waste incurred by hand cutting. By providing your installers with pre-cut film, you maintain tighter control over your inventory.

Provide complete employee training in less than half the time

To be sure that your customers are receiving the highest quality service, employee training is a necessity. With ComputerCut, you can reduce the learning curve normally associated with new employee training. That's because you won't have to teach them how to cut patterns precisely and consistently; ComputerCut takes care of it.

It's more appealing to your customers

Consistent, evenly cut patterns mean happier customers. And that means higher profits. The appeal of film not having to be cut on glass or a vehicle is highly compelling - plus, it results in less chance of any damage being done to your customers' property. That makes ComputerCut a win-win prospect for everybody!

Expand your business

Do you already have a plotter? ComputerCut software supports most popular plotters including those from Roland, Graphtec, Ioline, Summa and others, making it even quicker and easier to grow your business than ever before. Expand your existing plotter's capabilities to cut auto window tint, paint protection film, architectural window film or vinyl by using ComputerCut patterns or one of the other custom graphics databases we support.

For a complete list of the plotters we support, visit www.computercut.com.

Bekaert Specialty Films LLC, is a global leader in the development, manufacture and distribution of specialty films for use in solar control and safety window films and industrial applications. Headquartered in San Diego, California, Bekaert Specialty Films is a subsidiary of the Bekaert Group, a Belgian innovation and technology-driven company that develops, produces and distributes a wide range of metal transformation and coating products worldwide.
