Solar Gard® @ Glassex - GP&T

Ian Penfold presents on new generation window films uniting solar protection with safety and security

Solar Gard® Window Films announces today its participation at the Glassex and Glass Processing & Technology Exhibitions at the NEC in Birmingham from April 8th – April 10th, 2008.

Providing a national platform for buyers and sellers to meet, the two events represent the perfect opportunity for Ian Penfold to present Solar Gard's latest generation of window film solutions.

Taking place on April, 9th 2008 in the Seminar Theatre at GP&T, Ian's presentation "Keep safe – regulations 14 & 15" will take a closer look at the issues affecting health and safety in the workplace as well as the various benefits of window film applications as a complete solution for safety, solar performance, aesthetic and UV protection concerns.

Mr Penfold is a well-respected specialist with over 25 years experience in the window film and flat glass industry. He was recently appointed Chairman for the Applied Window Film Group by the Glass and Glazing Federation (GGF) and is also Flat Glass Sales Manager for Solar Gard Window Films, manufactured by Bekaert Specialty Films, in the UK and Ireland.

The events' cutting-edge conference program will feature free technical seminars covering a range of topical issues facing the Glass and Glazing industry. Conducted by leading industry experts, the presentations will provide practical advice and real-life solutions for solving a host of social and environmental issues associated with glass such as the reduction of energy usage, CO2 emissions and carbon footprint.

As the UK's only dedicated exhibition for the fenestration, doors and conservatory industry, Glassex (Hall 4) attracts visitors from a wide range of sectors including the building sector, door, window and conservatory manufacturers, installers, systems companies, hardware,

consumables and the public sector. In Hall 3A, the Glass Processing & Technology event will cover the flat, structural and decorative glass markets, as well as insulated glass and glass in the built environment.

Journalist who would like to schedule a meeting with Ian Penfold, can contact Duomedia Public Relations via maya.s@duomedia.com or call 0032 2 454 85 50.

Additional information about Solar Gard®'s benefits can be found online at www.solargard.com.

About Solar Gard®

Bekaert Specialty Films LLC., www.bekaertfilms.com is a global leader in the development, manufacture and distribution of specialty films for use as solar control and safety window films and for industrial applications. Used for vehicles and buildings to keep out the sun's heat, filter out ultraviolet radiation and hold glass together in the event of breakage, Bekaert Specialty Films delivers solutions for safety, security, glare, energy use and CO2 emission reduction. Distributed through a network of independent certified dealers and distributors in more than 60 countries, Bekaert's window film is sold under the Solar Gard®, Panorama®, Quantum® and Solar Gard Armorcoat® brands. Bekaert Specialty Films also manufactures industrial films for the electronics, medical, graphic arts and imaging, automotive and aerospace industries. Bekaert Specialty Films LLC., is headquartered in San Diego, CA and is a subsidiary of the Bekaert group (Euronext Brussels: BEKB), a \$4 billion specialized technology company headquartered in Belgium.
