

Solar Gard® Developing Automotive Window Film Skills

The Solar Gard® Developing Automotive Window Film Skills is a comprehensive, hands-on three day course covering all the basic skills, techniques and marketing techniques needed for a successful automotive window film business. The curriculum is highly interactive and provides for necessary one-on-one attention to develop both your skills and business know-how

Auto tint training is carried out in our purpose built tint shop training centre near Worcester.

The three-day training will consist of both theoretical and practical training

The 3-day course is an entry level course into the industry of window tinting taking you through all aspects of window tinting techniques that are designed to take the trainee from having no experience of handling films to a level where they can leave with fresh knowledge to tint a wide variety of different makes and models of vehicle.

Some of what you will learn during the course:

• Introduction & Information use profits

Legal Issues - Tools of the trade - Film types - Construction & Performance - Mounting Solutions - Shop design / Layout / Equipment - Marketing Information
